SUBJECT INDEX

Abdominal pain
- comparison of alternative diagnostic approaches for appendicitis (letter), 513
- diagnostic accuracy in appendicitis (letter and reply), 514
- functional gastrointestinal disorders in children, 73

Academic achievement
- lingering academic deficits of low birth weight children, 1035
- psychosocial and academic characteristics of extremely low birth weight adolescents who are free of major impairment, e725, 1665

Access to care
- addressing disparity in treatment received (letter and reply), 512
- do children receiving Supplemental Security Income who are enrolled in Medicaid fare better under a fee-for-service or comprehensive capitation model?, 196
- family reports of care denials for children enrolled in TennCare, e37, 242
- health services use and health care expenditures for children with disabilities, 79
- inequality of access to surgical specialty health care, e584, 1326
- unmet need for routine and specialty care: data from National Survey of Children With Special Health Care Needs (e109, 2004;113:399), 516 (erratum)
- why pediatricians need lawyers to keep children healthy, 224

Accidents. *See* Injuries

Acupuncture, for childhood persistent allergic rhinitis, 1242

Acute disseminated encephalomyelitis, Susac's syndrome in adolescent female presenting as, 276

Adenoidectomy, clinical assessment of pediatric obstructive sleep apnea, 33

Adherence to therapy
- integrating adherence to highly active antiretroviral therapy into children's daily lives, e591, 1326
- nonadherence with pediatric HIV therapy as medical neglect, e346, 847

Adolescents
- are clinical impressions of substance use accurate?, e536, 1322
- bariatric surgery for adolescents: view from the American Pediatric Surgical Association (commentary), 255
- bariatric surgery for severely overweight adolescents, 217
- bariatric surgery in adolescents: for treatment failures or health care system failures? (commentary), 252
- behavioral and emotional adjustment of teenagers in mainstream school who were born before 29 weeks' gestation, 676
- beliefs about risks of smoking "light" cigarettes, e445, 1073
- body mass index, waist circumference, and clustering of cardiovascular disease risk factors in a biracial sample of children and, e198, 482
- continuity of binge and harmful drinking from late adolescence and early adulthood, 714
- dating violence and associated sexual risk and pregnancy among adolescent girls in United States, e220, 484
- effect of parental R-rated movie restriction on adolescent smoking initiation, 149
- effects of a primary care-based intervention on violent behavior and injury, e392, 1071
- effects of anorexia nervosa on clinical, hematologic, biochemical, and bone density parameters in community-dwelling adolescent girls, 1574
- externalizing problem behaviors and headache: follow-up study of adolescent Finnish twins, 981
- Fourth Report on the Diagnosis, Evaluation, and Treatment of High Blood Pressure in Children and Adolescents, 555
- health care preferences and priorities of adolescents with chronic illnesses, 1272
- inhaled corticosteroids and risk of fractures in children and, 469
- new guidelines about latent tuberculosis infection in children and (commentary), 1084
- overweight children and adolescents as risk groups for iron deficiency, 104
- paternity after adolescent varicocele repair, 1631
- prediction models for evaluation of total-body bone mass with dual-energy X-ray absorptiometry among children and adolescents, e337, 846
- psychosocial and academic characteristics of extremely low birth weight adolescents who are free of major impairment, e725, 1665
- puberty and the onset of substance use and abuse, e300, 844
- quality of life in children and adolescents with attention-deficit/hyperactivity disorder, e541, 1322
- smoking patterns among young people with asthma (letter), 1370
- surgery for severely obese adolescents: further insight from the American Society for Bariatric Surgery (commentary), 253
- Susac's syndrome in adolescent female presenting as acute disseminated encephalomyelitis, 276
- targeted tuberculin skin testing and treatment of latent tuberculosis in children and, 1175
- trends in risk factors for cardiovascular disease, 1534
- update on type 2 diabetes in youth from the National Diabetes Education Program (commentary), 259
- varicocele in (commentary), 1669
- watching sex on television predicts adolescent initiation of sexual behavior, e280, 843

Adoption, 4-year-old child with unusual behaviors adopted at 6 months of age, 1425

Adrenal insufficiency, prophylaxis to prevent bronchopulmonary dysplasia, 1649

β-Adrenergic agonists, for asthma, best articles, 541

Adverse drug effects
- aggression, mania, and hypomania induction associated with atomoxetine (letter), 895
- extrapyramidal symptoms in 3-year-old boy after ingestion of aripiprazole (letter), 1743
- hyperlactatemia in HIV-uninfected infants who are exposed to antiretrovirals, e598, 1327
- interpretation of findings from selective serotonin reuptake inhibitor–exposed neonates (letter and reply), 1739
- natural history of lipid abnormalities and fat redistribution among HIV-infected children receiving protease inhibitor-containing, highly active antiretroviral therapy regimens, e235, 484
- nephrotic syndrome complicating α-glucosidase replacement therapy for Pompe disease, e532, 1080
- virilization of young children after topical androgen use by parents, 282

Adverse vaccine effects
- thimerosal-containing vaccines and autistic spectrum disorder, 793
- thimerosal exposure in infants and developmental disorders
  - prospective cohort study in the United Kingdom does not support a causal association, 577
  - retrospective cohort study in the United Kingdom does not support a causal association, 584
- underimmunization among children: effects of vaccine safety concerns on immunization status, e16, 241

Advocacy
role of pediatricians in advocating life support training courses for parents and the public, e761, 1667
role of pediatricians in advocating life support training courses for parents and the public (AAP policy statement), 1676
why pediatricians need lawyers to keep children healthy, 224
Aggressive behavior
aggression, mania, and hypomania induction associated with atomoxetine (letter), 895
children's violent television viewing: are parents monitoring?, 94
dating violence and associated sexual risk and pregnancy among adolescent girls in United States, e220, 484
effects of a primary care-based intervention on violent behavior and injury, e392, 1071
physical aggression during early childhood, e43, 243
unsafe and violent behavior in commercials aired during televised sporting events, e694, 1662
Air pollution: health hazards to children (AAP policy statement), 1699
Air rifles, injury risk of nonpowder guns (AAP technical report), 1357
Alcohol consumption
association between patterns of maternal substance use and infant birth weight, length, and head circumference, e226, 484
continuity of binge and harmful drinking from late adolescence and early adulthood, 714
dealing with the parent whose judgment is impaired by alcohol or drugs: legal and ethical considerations (AAP clinical report), 869
puberty and the onset of substance use and abuse, e300, 844
Allergic rhinitis
best articles, 525
clinical trial of acupuncture for, 1242
Allergy
best articles, 519
early infant multivitamin supplementation and increased risk for food allergy and asthma, 27
endotoxin exposure and eczema in first year of life, 13
Amblyopia, Pediatric Eye Disease Investigator Group report may be too optimistic about efficacy of treatment (letter and reply), 1366
Ambulation in cerebral palsy, prognosis for, 1264
American Academy of Pediatrics (AAP)
Clinical practice guideline: Management of hyperbilirubinemia in the newborn infant 35 or more weeks of gestation, 297 (erratum, 1138)
Clinical report
Committee on Children with Disabilities: Managed care and children with special health care needs, 1693
Committee on Children With Disabilities: Providing a primary care medical home for children and youth with cerebral palsy, 1106
Committee on Genetics: Prenatal screening and diagnosis for pediatricians, 889
Committee on Medical Liability: Dealing with the parent whose judgment is impaired by alcohol or drugs: legal and ethical considerations, 869
Committee on Pediatric AIDS and Canadian Paediatric Society: Evaluation and treatment of the human immunodeficiency virus-1–exposed infant, 497
Committee on Pediatric Emergency Medicine and Section on Anesthesiology and Pain Medicine: Relief of pain and anxiety in pediatric patients in emergency medical systems, 1348
Committee on Psychosocial Aspects of Child and Family Health: The pediatrician's role in the prevention of missing children, 1100
Section on Surgery, Section on Anesthesia and Pain Medicine, and Committee on Bioethics: Do-not-resuscitate orders for pediatric patiens who require anesthesia and surgery, 1686

Early closure of the Watterberg trial, 1670
Early release of articles in *Pediatrics:* accelerating the dissemination of scientific inquiry, 1089
The Early Treatment for Retinopathy of Prematurity study: better outcomes, changing strategy, 490
Gains in children's health insurance coverage but additional progress needed, 1338
Head Start's national reporting system: a work in progress, 858
Hyperbilirubinemia and kernicterus: 50 years later, 263
International Pediatric Congress, 1088
Journeys from childhood to midlife: risk, resilience, and recovery, 492
Management of hyperbilirubinemia: quality of evidence and cost, 1086
New guidelines about latent tuberculosis infection in children and adolescents: a welcome advancement, 1084
Open sesame? increasing access to medical literature, 265
Otitis, antibiotics, and the greater good, 1333
Palliative care: a supportive adjunct to pediatric phase I clinical trials for anticancer agents?, 852
Pathology research into sudden infant death syndrome: where do we go from here?, 492
Preemptive strike in war on pain: is it a safe strategy for our vulnerable infants?, 1335
Preschoolers, computers, and school readiness: are we on to something?, 852
Proactive management of extremely premature infants, 264
Resuscitation research and the final rule: is there an impasse?, 859
Risk of birth defects and other adverse outcomes associated with assisted reproductive technology, 256
To sleep or not to sleep: that remains the question, 1337
Supporting vulnerable preschool children: connecting the dots before kindergarten, 1086
Surgery for severely obese adolescents: further insight from the American Society for Bariatric Surgery, 253
Water births: a naked emperor, 855
Communication
e-mail communication between pediatricians and their patients (AAP clinical report), 317
health care preferences and priorities of adolescents with chronic illnesses, 1272
telephone vs. e-mail follow-up after a pediatric emergency department visit, 988
Community pediatrics
achieving the unfinished agenda through public–private partnerships (Job Lewis Smith Award), 474
community-specific recommendations for first-line treatment of acute otitis media, 342
role of pediatricians in advocating life support training courses for parents and the public, e761, 1667
role of pediatricians in advocating life support training courses for parents and the public (AAP policy statement), 1676
Computed tomography, reduction of cancer risk associated with pediatric computed tomography by development of new techniques, 205
Computers
computer-aided anthropometry in evaluation of dysmorphic children, e333, 846
cystic fibrosis on the Internet: survey of site adherence to AMA guidelines, 100
e-mail communication between pediatricians and their patients (AAP clinical report), 317
increasing access to medical literature (commentary), 265
Internet: new medical problem or invaluable ally?, 817
preschoolers, computers, and school readiness: are we on to something? (commentary), 852

Computers—*continued*
use of voice recognition software in an outpatient pediatric specialty practice, e290, 843
Congenital conditions
Clostridium septicum myonecrosis in congenital neutropenia, e757, 1667
conditions leading to pediatric cardiology consultation in tertiary academic hospital, e409, 1071
congenital aplastic anemia caused by mutations in *SBDS* gene: rare presentation of Schwachman-Diamond syndrome, e387, 850
echocardiographic evaluation of asymptomatic parental and sibling cardiovascular anomalies associated with congenital left ventricular outflow tract lesions, 691
economic analysis of palivizumab in infants with congenital heart disease, 1606
evaluation and treatment of the human immunodeficiency virus-1–exposed infant (AAP clinical report), 497
laparoscopic diagnosis and cure of hyperinsulinism in focal adenomatous hyperplasia in infancy, e520, 1079
missed opportunities for perinatal HIV prevention among HIV-exposed infants born 1996–2000 (letter), 328, 905
molecular epidemiology of childhood mitochondrial encephalomyopathies in Finnish population, 443
novel *CIAS1* mutation and plasma/cerebrospinal fluid cytokine profile in a German patient with neonatal-onset multisystem inflammatory disease responsive to methotrexate, e124, 249
prediction of IQ and achievement at age 8 years from neurodevelopmental status at age 1 year in children with D-transposition of great arteries, e572, 1325
Conscious sedation, with propofol, e74, 245
Constipation, functional gastrointestinal disorders in children, 73
Continuous positive airway pressure
delivery room continuous positive airway pressure/positive end-expiratory pressure in extremely low birth weight infants, 651
does experience with use improve over time in extremely low birth weight infants?, 697
Corticosteroids
are inhaled corticosteroids safe and effective in infants with asthma-like symptoms? (letter), 325
for asthma, best articles, 543
blood pressure at 6 years of age after prenatal exposure to betamethasone, e373, 849
early closure of Watterberg trial (commentary), 1670
immunization responses in preterm infants who receive postnatal steroids (letter and reply), 1127
inhaled corticosteroids and risk of fractures in children and adolescents, 469
prophylaxis of early adrenal insufficiency to prevent bronchopulmonary dysplasia, 1649
tapering course of dexamethasone to reduce duration of ventilator dependency in very low birth weight infants (1999;104:22–27), 1746 (erratum)
yes, steroids are safe in infants with asthma-like symptoms (letter), 904
Cough
azithromycin vs. erythromycin estolate for pertussis, e96, 246
controlled study of relationship between *Bordetella pertussis* infections and sudden unexpected deaths among German infants, e9, 240
effect of dextromethorphan, diphenhydramine, and placebo on nocturnal cough and sleep quality for coughing children and their parents, e85, 245
effect of dextromethorphan, diphenhydramine, and placebo on nocturnal cough and sleep quality for coughing children and their parents (letter), 1370
Counseling, of parents and children on sun protection, 1056
Crohn's disease, growth retardation and, 1281
Crying, sleep of excessively crying infants: 24-hour ambulatory sleep polygraphy study, 592
Cultural factors. *See also* Race/ethnicity
cultural and linguistic determinants in diagnosis and management of developmental delay in 4-year-old, 1442
cultural competence policies and other predictors of asthma care quality for Medicaid-insured children, e102, 247
ensuring culturally effective pediatric care: implications for education and health policy (AAP policy statement), 1677
predictive value of a cross-cultural asthma case-detection tool in an elementary school population, e307, 844
Cystic fibrosis
evaluation of a residential education program for parents of infants with newly diagnosed cystic fibrosis, 411
implementation of newborn screening for cystic fibrosis varies widely between states (letter), 515
on Internet: survey of site adherence to AMA guidelines, 100
normal annual increase of bone mineral density during 2 years in patients with, 435
Cytokines
measurement of interleukin 8 and C-reactive protein reduced unnecessary antibiotic therapy in newborns, 1 (erratum, 1746)
novel *CIAS1* mutation and plasma/cerebrospinal fluid cytokine profile in a German patient with neonatal-onset multisystem inflammatory disease responsive to methotrexate, e124, 249

Dating violence and associated sexual risk and pregnancy among adolescent girls in United States, e220, 484
Day care, physical activity among children attending preschools, 1258
Dehydration
cost-effectiveness of postnatal home nursing visits for prevention of hospital care for jaundice and dehydration, 1015
serum electrolyte panel in management of dehydration treated with intravenous fluids, 1227
Dental care
dental caries of refugee children, e733, 1655
dental screening and referral of young children by pediatric primary care providers, e642, 1329
early preventive dental visits: effects on subsequent utilization and costs, e418, 1072
Depression, interpretation of findings from selective serotonin reuptake inhibitor–exposed neonates (letter and reply), 1739
Development
bias in reported neurodevelopmental outcomes among extremely low birth weight survivors, 404
developmental outcomes with early orthotopic liver transplantation for infants with neonatal-onset urea cycle defects and a female patient with late-onset ornithine transcarbamylase deficiency, e523, 1079
effect of chelation therapy on neuropsychological and behavioral development of lead-exposed children after school entry, 19
effects of home visits by paraprofessionals and by nurses: age 4 follow-up results, 1560
effects of nurse home-visiting on maternal life course and child development: age 6 follow-up results, 1550
enhancing developmental services in child health supervision, 827
Healthy Steps, 820
immigrant mothers' knowledge of parenting and children's development, e557, 1324
journeys from childhood to midlife: risk, resilience, and recovery (commentary), 492
longitudinal assessment of adaptive behavior in infants and young children with newly diagnosed epilepsy, 645
Developmental disorders
Journal of Developmental and Behavioral Pediatrics challenging cases, 1432
child with learning disability: navigating school-based services, 1432

cultural and linguistic determinants in diagnosis and management of developmental delay in 4-year-old, 1442
fatigue, decreased interest in play, motor delay, and elevated liver-function tests in 4-year-old boy, 1437
modified screening tool for autism for Chinese children, e166, 479
risperidone for disruptive behavioral symptoms in children with autistic and other pervasive developmental disorders, e634, 1329
terminal 22q deletion syndrome as cause of speech and language disability in autism spectrum, 451
thimerosal-containing vaccines and autistic spectrum disorder, 793
thimerosal exposure in infants and
prospective cohort study in the United Kingdom does not support a causal association, 577
retrospective cohort study in the United Kingdom does not support a causal association, 584
when Asperger's syndrome and a nonverbal learning disability look alike, 1458
Dextromethorphan
effect of dextromethorphan, diphenhydramine, and placebo on nocturnal cough and sleep quality for coughing children and their parents, e85, 245
effect of dextromethorphan, diphenhydramine, and placebo on nocturnal cough and sleep quality for coughing children and their parents (letter), 1370
Diabetes mellitus
benefits of continuous subcutaneous insulin infusion in very young children with type 1 diabetes, 1601
continuous subcutaneous insulin infusion and flexible multiple daily insulin regimen using glargine in type 1 diabetes, e91, 246
evaluation of type 2 diabetes screening protocol in an urban pediatric clinic, 141
update on type 2 diabetes in youth from the National Diabetes Education Program (commentary), 259
Diagnosis. *See also* Laboratory testing; Screening
comparison of alternative diagnostic approaches for appendicitis (letter), 513
cultural and linguistic determinants in diagnosis and management of developmental delay in 4-year-old, 1442
diagnosis, treatment, and long-term management of Kawasaki disease (AAP policy statement), 1708
diagnosis and treatment of behavioral health disorders in pediatric practice, 601
diagnostic accuracy in appendicitis (letter and reply), 514
diagnostic approach and presumed cause of unexplained chronic pain, 1220
does sleep or sleep deprivation increase epileptiform discharges in pediatric electroencephalograms?, 658
effects of tympanometry on diagnosis and treatment of acute otitis media, 177
Fourth Report on the Diagnosis, Evaluation, and Treatment of High Blood Pressure in Children and Adolescents, 555

increasing access to medical literature (commentary), 265
junk science and glass houses (letter and reply), 330
Juvenile recurrent parotitis, 9

Karyotype, ascertainment bias in Turner syndrome: insights from girls who were diagnosed incidentally in prenatal life, 640
Kauai Longitudinal Study, journeys from childhood to midlife: risk, resilience, and recovery (commentary), 492
Kawasaki disease
diagnosis, treatment, and long-term management (AAP policy statement), 1708
epidemiology in Taiwan, 1996–2002, e678, 1660
older age is risk factor for development of cardiovascular sequelae in, 751
role of aspirin in febrile stage of, e689, 1661
Kernicterus
cerebral metabolism in severe neonatal hyperbilirubinemia, 291
cost-effectiveness of strategies for prevention in newborns, 917
hyperbilirubinemia among African American, glucose-6-phosphate dehydrogenase-deficient neonates, e213, 483
management of hyperbilirubinemia in the newborn infant 35 or more weeks of gestation (AAP clinical practice guideline), 297 (erratum, 1138)
research on prevention of bilirubin-induced brain injury and, 229
Kidney
nephrotic syndrome complicating α-glucosidase replacement therapy for Pompe disease, e532, 1080
procalcitonin as marker of severity of acute pyelonephritis, e249, 485
Kikuchi-Fujimoto disease, with prolonged fever, e752, 1666

Laboratory testing
measurement of interleukin 8 and C-reactive protein reduced unnecessary antibiotic therapy in newborns, 1 (erratum, 1746)
newborn screening for lysosomal storage diseases, 909
serum electrolyte panel in management of dehydration treated with intravenous fluids, 1227
spectrum bias of a rapid antigen detection test for group A β-hemolytic streptococcal pharyngitis, 182
targeted tuberculin skin testing and treatment of latent tuberculosis in children and adolescents, 1175
Language
cultural and linguistic determinants in diagnosis and management of developmental delay in 4-year-old, 1442
follow-up care of high-risk infants, 1377
terminal 22q deletion syndrome as cause of speech and language disability in autism spectrum, 451
Laparoscopic diagnosis and cure of hyperinsulinism in focal adenomatous hyperplasia in infancy, e520, 1079
Lead exposure
effect of chelation therapy on neuropsychological and behavioral development of lead-exposed children after school entry, 19
iron deficiency and blood lead levels (letter), 329
lead poisoning from toy necklace, 1096
Learning disability
navigating school-based services, 1432
when Asperger's syndrome and a nonverbal learning disability look alike, 1458
Legal issues
dealing with the parent whose judgment is impaired by alcohol or drugs: legal and ethical considerations (AAP clinical report), 869
e-mail communication between pediatricians and their patients (AAP clinical report), 317
violators of a child passenger safety law, 109

Legal issues—*continued*
why pediatricians need lawyers to keep children healthy, 224
Length of hospital stay
clinical outcomes of near-term infants, 372
clinical redesign using all patient refined diagnosis-related groups, 965
equivalent lengths of stay of pediatric patients hospitalized in rural and nonrural hospitals, e400, 1071
increase in cost and length of stay associated with nosocomial bloodstream infections in surviving very low birth weight infants, 348
Leukemia, population mixing and (letter), 330
Leukotriene antagonists, for asthma, best articles, 547
Lice, simple treatment for head lice, e275, 843
Life-saving health care for undocumented children, 1316
Life support training courses for parents and the public
role of pediatricians in advocating for, e761, 1667
role of pediatricians in advocating for (AAP policy statement), 1676
Liver disease
fatigue, decreased interest in play, motor delay, and elevated liver-function tests in 4-year-old boy, 1437
hepatitis A in Hispanic children who live along the United States–Mexico border, e68, 244
in West Nile virus infection, 1673
Liver transplantation, developmental outcomes for infants with neonatal-onset urea cycle defects and a female patient with late-onset ornithine transcarbamylase deficiency, e523, 1079
Low birth weight. *See also* Neonates; Perinatal pediatrics; Prematurity
behavioral outcomes and psychopathology among very low birth weight infants at age 20 years, 932
bias in reported neurodevelopmental outcomes among extremely low birth weight survivors, 404
cost-benefit threshold for low birth weight infants (letter and reply), 508
delivery room continuous positive airway pressure/positive end-expiratory pressure in extremely low birth weight infants, 651
does experience with use of nasal continuous positive airway pressure improve over time in extremely low birth weight infants?, 697
effectiveness of neonatal intensive care for extremely low birth weight infants (letter and reply), 1374
executive functioning in school-aged children who were born very preterm or with extremely low birth weight in the 1990s, 50
follow-up care of high-risk infants, 1377
increase in cost and length of stay associated with nosocomial bloodstream infections in surviving very low birth weight infants, 348
lingering academic deficits of low birth weight children, 1035
low-normal gestational age as predictor of asthma at 6 years of age, e327, 846
maternal and infant factors associated with excess kindergarten costs, 720
meconium obstruction in very low birth weight premature infant, 285
meconium obstruction in very low birth weight premature infant (letter and reply), 1367
neonatal brain MRI before discharge is better than serial cranial ultrasound in predicting cerebral palsy in very low birth weight preterm infants, 992
neurodevelopmental outcome and growth at 18–22 months' corrected age in extremely low birth weight infants treated with early erythropoietin and iron, 1287
polymorphism of tumor necrosis factor-α and risk and severity of bronchopulmonary dysplasia among very low birth weight infants, e243, 485
prevalence, stability, and predictors of clinically significant behavior problems in low birth weight children at 3, 5, and 8 years of age, 736
prophylaxis of early adrenal insufficiency to prevent bronchopulmonary dysplasia, 1649
psychosocial and academic characteristics of extremely low birth weight adolescents who are free of major impairment, e725, 1665
sibling-controlled study of brain volumes in adult survivors of very low birth weight, 367
tapering course of dexamethasone to reduce duration of ventilator dependency in very low birth weight infants (1999;104:22–27), 1746 (erratum)
Lung function and disease
are inhaled corticosteroids safe and effective in infants with asthma-like symptoms? (letter), 325
bile acid pneumonia: "new" form of neonatal respiratory distress syndrome?, 269
brain-type natriuretic peptide in diagnosis and management of persistent pulmonary hypertension of newborn, 1297
community organization to reduce the need for acute care for asthma among African American children in low-income neighborhoods, 116
cost-effectiveness of inhaled nitric oxide for persistent pulmonary hypertension of newborn, 417
cultural competence policies and other predictors of asthma care quality for Medicaid-insured children, e102, 247
early infant multivitamin supplementation and increased risk for food allergy and asthma, 27
epidemiology of childhood tuberculosis in United States, 1993–2001, 333
impact of physiologic definition on bronchopulmonary dysplasia rates, 1305
limits of HEDIS criteria for determining asthma severity for children, 1049
long-term pulmonary sequelae of extracorporeal membrane oxygenation for neonatal respiratory failure, 1292
new guidelines about latent tuberculosis infection in children and adolescents (commentary), 1084
pertussis pneumonia, hypoxemia, hyperleukocytosis, and pulmonary hypertension, e264, 486
polymorphism of tumor necrosis factor-α and risk and severity of bronchopulmonary dysplasia among very low birth weight infants, e243, 485
targeted tuberculin skin testing and treatment of latent tuberculosis in children and adolescents, 1175
validation of multistage asthma case-detection procedure for elementary school children, e459, 1075
Lymphadenopathy, Kikuchi-Fujimoto disease with prolonged fever, e752, 1666
Lysosomal storage diseases
natural history of type B Niemann-Pick disease, e672, 1659
newborn screening for, 909

Macrophage activation syndrome mimicking life-threatening infection in patient with variable immunodeficiency, centromeric instability, and facial anomalies (letter), 1127
Magnetic resonance imaging (MRI)
apparent diffusion coefficient in posterior limb of internal capsule predicts outcome after perinatal asphyxia, 999
diffusion-weighted MRI in term perinatal brain injury, 1004
neonatal brain MRI before discharge is better than serial cranial ultrasound in predicting cerebral palsy in very low birth weight preterm infants, 992
sibling-controlled study of brain volumes in adult survivors of very low birth weight, 367
Susac's syndrome in adolescent female presenting as acute disseminated encephalomyelitis, 276

uncomplicated intraventricular hemorrhage is followed by reduced cortical volume at near-term age, e367, 848
Managed care
children with special health care needs (AAP clinical report), 1693
cultural competence policies and other predictors of asthma care quality for Medicaid-insured children, e102, 247
do children receiving Supplemental Security Income who are enrolled in Medicaid fare better under a fee-for-service or comprehensive capitation model?, 196
family reports of care denials for children enrolled in TennCare, e37, 242
increased use of second-generation macrolide antibiotics in nine health plans, 1206
Mass media
attention deficits and television viewing (letter and reply), 511
children's violent television viewing: are parents monitoring?, 94
does children's watching of television cause attention problems? retesting hypothesis in a Danish cohort (letter and reply), 1372
effect of parental R-rated movie restriction on adolescent smoking initiation, 149
pediatricians and APA guidelines for children's media use, 1235
unsafe and violent behavior in commercials aired during televised sporting events, e694, 1662
watching sex on television predicts adolescent initiation of sexual behavior, e280, 843
Measles vaccine
measles inclusion body encephalitis as complication of stem cell transplantation, e657, 1330
potential for worldwide eradication of measles, 1065
topical 4% amethocaine gel reduces pain of subcutaneous measles-mumps-rubella vaccination, e720, 1665
Mechanical ventilation
continuous quality improvement: reducing unplanned extubations in pediatric intensive care unit, 628
duration in life-threatening pediatric asthma: description of an acute asphyxial subgroup, 762
life-threatening human metapneumovirus pneumonia requiring extracorporeal membrane oxygenation in preterm infant, e517, 1079
tapering course of dexamethasone to reduce duration of ventilator dependency in very low birth weight infants (1999;104:22–27), 1746 (erratum)
Meconium obstruction
in very low birth weight premature infant, 285
in very low birth weight premature infant (letter and reply), 1367
Medicaid
cultural competence policies and other predictors of asthma care quality for Medicaid-insured children, e102, 247
direct cost analyses of palivizumab treatment in at-risk children, 1612
do children receiving Supplemental Security Income who are enrolled in Medicaid fare better under a fee-for-service or comprehensive capitation model?, 196
family reports of care denials for children enrolled in TennCare, e37, 242
gains in children's health insurance coverage but additional progress needed (commentary), 1338
inequality of access to surgical specialty health care, e584, 1326
managed care and children with special health care needs (AAP clinical report), 1693
providing life-saving health care to undocumented children, 1316
Medical education
on continuity of care in pediatric training (commentary), 1082
ensuring culturally effective pediatric care: implications for education and health policy (AAP policy statement), 1677
pediatric fellowship training (policy statement), 295
state of residency training: period of transformation of graduate medical education, 832
time in continuity clinic as predictor of continuity of care for pediatric residents, 1023
Medical errors
pediatric patient safety in hospitals: national picture in 2000 (2004; 113:1741), 907 (erratum)
use of incident reports by physicians and nurses for documentation of, 729
Medical home, for children and youth with cerebral palsy (AAP clinical report), 1106
Medical literature
early release of articles in *Pediatrics*: accelerating the dissemination of scientific inquiry (commentary), 1089
increasing access to (commentary), 265
junk science and glass houses (letter and reply), 330
Meningitis
indicators of acute bacterial meningitis in children at rural Kenyan district hospital, e713, 1664
varicella zoster virus meningitis in previously immunized child, e273, 487
in West Nile virus infection, 1673
Meningomyelocele, neonatal loss of motor function in human spina bifida aperta, 427
Mental status changes, characteristics that distinguish accidental from abusive injury in hospitalized young children with head trauma, 165
Mercury exposure
thimerosal-containing vaccines and autistic spectrum disorder, 793
thimerosal exposure in infants and developmental disorders
prospective cohort study in the United Kingdom does not support a causal association, 577
retrospective cohort study in the United Kingdom does not support a causal association, 584
Methotrexate, novel *CIAS1* mutation and plasma/cerebrospinal fluid cytokine profile in a German patient with neonatal-onset multisystem inflammatory disease responsive to, e124, 249
Microangiopathy of brain, retina, and inner ear in adolescent female presenting as acute disseminated encephalomyelitis, 276
Migraine, celiac disease among children with (letter), 1371
Military pediatricians in Southwest Asia (letter), 898
Mitochondrial disease
clinical spectrum, morbidity, and mortality, 925
molecular epidemiology of childhood mitochondrial encephalomyopathies in Finnish population, 443
Mortality
circumstances surrounding the deaths of hospitalized children: opportunities for palliative care, e361, 848
controlled study of relationship between *Bordetella pertussis* infections and sudden unexpected deaths among German infants, e9, 240
death and dying in NICU, 1620
disappearing income gradient in New York City birth outcomes from 1988 to 2001, e51, 243
does sudden infant death syndrome gene exist?, e506, 1078
EPIBEL Study: outcomes to discharge from hospital for extremely preterm infants in Belgium, 663
among Kenyan children admitted to rural district hospital on weekends as compared with weekdays (letter and reply), 1737
in mitochondrial disease, 925
Mortality Index for Neonatal Transportation Score, e424, 1072
pathology research into sudden infant death syndrome (commentary), 492
sudden infant death syndrome and unclassified sudden infant deaths, 234
Mothers
association between patterns of maternal substance use and infant birth weight, length, and head circumference, e226, 484
association of breastfeeding with maternal control of infant feeding at age 1 year, e577, 1325
effects of nurse home-visiting on maternal life course and child development: age 6 follow-up results, 1550

Mothers—*continued*
HIV infection and zidovudine use in childbearing women, e707, 1663
immigrant mothers' knowledge of parenting and children's development, e557, 1324
maternal and infant factors associated with excess kindergarten costs, 720
maternal smoking and infantile gastrointestinal dysregulation: colic, e497, 1077
nutritional implications of observed neurobehavioral disturbances and reduced gestation length in infants of mothers using selective serotonin reuptake inhibitors during pregnancy (letter), 325
predicting preschooler obesity at birth: role of maternal obesity in early pregnancy, e29, 242
Motor vehicle safety, violators of a child passenger safety law, 109
Muscular dystrophy
disruptive classroom behavior in Amish school-aged child with, 1501
fatigue, decreased interest in play, motor delay, and elevated liver-function tests in 4-year-old boy, 1437
Myocardial infarction, possible pathogenic role of patent foramen ovale and heritable thrombophilia, 255, 486
Myonecrosis, *Clostridium septicum*, in congenital neutropenia, e757, 1667

National Diabetes Education Program, update on type 2 diabetes in youth (commentary), 259
Navel piercing jewelry, temporary removal for surgery and imaging studies, e384, 849
Necrotizing enterocolitis
safety of enteral feed volumes in neonates at risk for (letter), 327
slow vs. rapid feeding volume advancement in preterm infants, 1597
Neighborhood Asthma Coalition, community organization to reduce the need for acute care for asthma among African American children in low-income neighborhoods, 116
Neonatal intensive care unit (NICU)
cost-effectiveness of inhaled nitric oxide for persistent pulmonary hypertension of newborn, 417
death and dying in, 1620
early intervention in preterm infants after discharge from hospital (letter and reply), 1738
effectiveness of neonatal intensive care for extremely low birth weight infants (letter and reply), 1374
hand hygiene practices in, e565, 1325
levels of neonatal care (AAP policy statement), 1341
palivizumab use in very premature infants in, e554, 1324
preemptive strike in war on pain: is it a safe strategy for our vulnerable infants? (commentary), 1335
specific Newborn Individualized Developmental Care and Assessment Program movements are associated with acute pain in preterm infants in, 65
Neonates. *See also* Infants; Low birth weight; Perinatal pediatrics; Prematurity
age terminology during perinatal period (AAP policy statement), 1362
bile acid pneumonia: "new" form of neonatal respiratory distress syndrome?, 269
brain-type natriuretic peptide in diagnosis and management of persistent pulmonary hypertension of newborn, 1297
cerebral metabolism in severe neonatal hyperbilirubinemia, 291
clinical outcomes and secondary diagnoses for infants born with hypoplastic left heart syndrome, e160, 478
clinical outcomes of near-term infants, 372
comparison of isotonic amino acid and hypotonic salt umbilical arterial catheter infusions, 377
conflict of interest and purpose in bilirubin screening (letter and reply), 1133
congenital hypothyroidism, role of thyroid scintigraphy in, 1660, e683
cost-effectiveness of postnatal home nursing visits for prevention of hospital care for jaundice and dehydration, 1015
cost-effectiveness of strategies to prevent kernicterus in, 917
declining diagnosis of birth asphyxia in California: 1991–2000, 1584
early intervention in preterm infants after discharge from hospital (letter and reply), 1738
effectiveness of neonatal intensive care for extremely low birth weight infants (letter and reply), 1374
evidence-based review of issues concerning neonatal hyperbilirubinemia, e130, 249
hyperbilirubinemia among African American, glucose-6-phosphate dehydrogenase-deficient neonates, e213, 483
hyperbilirubinemia and kernicterus: 50 years later (commentary), 263
hyperbilirubinemia benchmarking (letter), 323, 902
hyperbilirubinemia guidelines and unintended harms (letter and reply), 1134
impact of physiologic definition on bronchopulmonary dysplasia rates, 1305
implementation of newborn screening for cystic fibrosis varies widely between states (letter), 515
initial hypoglycemia and neonatal brain injury in term infants with severe fetal acidemia, 361
interpretation of findings from selective serotonin reuptake inhibitor–exposed neonates (letter and reply), 1739
intervention recommendations for neonatal hyperbilirubinemia (letter), 322
invasive staphylococcal disease in, 953
levels of neonatal care (AAP policy statement), 1341
management of hyperbilirubinemia: quality of evidence and cost (commentary), 1086
management of hyperbilirubinemia in newborns using a benchmarking model (letter), 902
management of hyperbilirubinemia in the newborn infant 35 or more weeks of gestation (AAP clinical practice guideline), 297 (erratum, 1138)
measurement of interleukin 8 and C-reactive protein reduced unnecessary antibiotic therapy in newborns, 1 (erratum, 1746)
meconium obstruction in very low birth weight premature infant, 285
meconium obstruction in very low birth weight premature infant (letter and reply), 1367
Mortality Index for Neonatal Transportation Score, e424, 1072
neonatal brain MRI before discharge is better than serial cranial ultrasound in predicting cerebral palsy in very low birth weight preterm infants, 992
neonatal genital herpes simplex virus type 1 infection after Jewish ritual circumcision, e259, 486
neonatal loss of motor function in human spina bifida aperta, 427
neonatal procedural pain and preterm infant cortisol response to novelty at 8 months, e77, 245
newborn infant with disorder of sexual differentiation, 1473
perinatal stroke in children with motor impairment, 612
predictors of hospital readmission of Manitoba newborns within 6 weeks postbirth discharge, 708
presacral neuroenteric fistula in newborn presenting with an epidural abscess, e527, 1080
proactive management of extremely premature infants (commentary), 264
proactive management promotes outcome in extremely preterm infants, 58
pseudothrombocytopenia in a preterm neonate, 273
research on prevention of bilirubin-induced brain injury and kernicterus, 229
safety of enteral feed volumes in neonates at risk for necrotizing enterocolitis (letter), 327
screening for lysosomal storage diseases, 909
specific Newborn Individualized Developmental Care and Assessment Program movements are associated with acute pain in preterm infants in, 65

Nephrotic syndrome complicating α-glucosidase replacement therapy for Pompe disease, e532, 1080
Neural tube defects, prenatal screening and diagnosis for pediatricians (AAP clinical report), 889
Neurodevelopment
bias in reported neurodevelopmental outcomes among extremely low birth weight survivors, 404
does interleukin-6 genotype influence cerebral injury or developmental progress after preterm birth?, 941
early intervention in preterm infants after discharge from hospital (letter and reply), 1738
effect of chelation therapy on neuropsychological and behavioral development of lead-exposed children after school entry, 19
effect of chronic or intermittent hypoxia on cognition in childhood, 805
executive functioning in school-aged children who were born very preterm or with extremely low birth weight in the 1990s, 50
follow-up care of high-risk infants, 1377
outcome and growth at 18–22 months' corrected age in extremely low birth weight infants treated with early erythropoietin and iron, 1287
prediction of IQ and achievement at age 8 years from neurodevelopmental status at age 1 year in children with D-transposition of great arteries, e572, 1325
psychosocial and academic characteristics of extremely low birth weight adolescents who are free of major impairment, e725, 1665
thimerosal-containing vaccines and autistic spectrum disorder, 793
thimerosal exposure in infants and developmental disorders
prospective cohort study in the United Kingdom does not support a causal association, 577
retrospective cohort study in the United Kingdom does not support a causal association, 584
Neuroenteric fistula, presacral, in newborn presenting with an epidural abscess, e527, 1080
Neurologic disorders
in celiac disease: mediation by brain perfusion changes (letter and reply), 1734
neurologic complications associated with influenza A during 2003–2004 in Houston, e626, 1329
neurotoxicities of star anise tea in infants, e653, 1330
Susac's syndrome in adolescent female presenting as acute disseminated encephalomyelitis, 276
Neutropenia, congenital, *Clostridium septicum* myonecrosis in, e757, 1667
Niemann-Pick disease, type B, natural history, e672, 1659
Nitric oxide, cost-effectiveness of inhaled nitric oxide for persistent pulmonary hypertension of newborn, 417
Nosocomial bloodstream infection, cost and length of stay associated with, in surviving very low birth weight infants, 348
Nurses
cost-effectiveness of postnatal home nursing visits for prevention of hospital care for jaundice and dehydration, 1015
effects of home visits by paraprofessionals and by nurses: age 4 follow-up results, 1560
effects of nurse home-visiting on maternal life course and child development: age 6 follow-up results, 1550
use of incident reports by physicians and nurses to document medical errors, 729
Nutrition. *See* Diet and nutrition; Feeding
Nutritional rickets in ichthyosis and response to calcipotriene, e119, 249

Obesity and overweight
bariatric surgery for adolescents: view from the American Pediatric Surgical Association (commentary), 255
